9. Correlations between the content of the course and the requirements of the professional field and relevant employers

The student is acquainted with the main pathological diseases in the dento-maxillary apparatus he will face later in the clinic and practice, as well as with the paraclinical investigations that help diagnose these diseases, the main therapeutic means and implications for the general condition of the patient. Thus, he / she acquires the necessary information and skills to acquire, in the remaining years of study, more complex knowledge according to the current requirements of the labor market in the field of health, meeting the European educational and professional standards.

It should be noted that the profession of dental practitioner is regulated at EU level, including through minimum training standards, which are considered in the curriculum content.

In order to sketch and standardize the content, as well as the choice of teaching / learning methods, the discipline holders organized and participated in the didactic workshops of the national conferences on dental medicine.

The meetings covered discussions with Dental Emergency Researchers from other university centers, identifying the needs and expectations of employers in the field, and co-ordination with other similar programs within other higher education institutions.
