DE MEDICINĂ ȘI FARMACIE
VICTOR BABEȘ | TIMIȘOARA

FACULTY OF DENTAL MEDICINE

UNIVERSITY STUDY PROGRAMME:

DENTAL MEDICINE

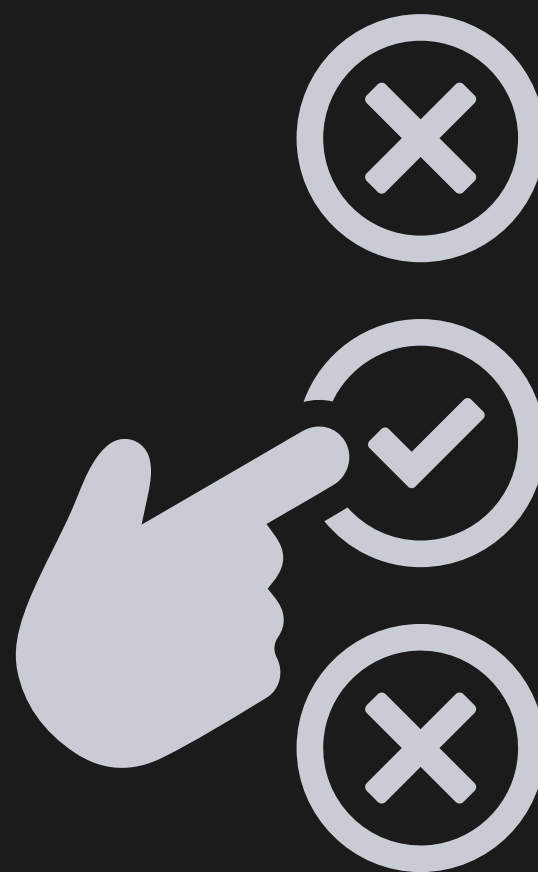

OPTIONAL DISCIPLINE:

INDIVIDUALIZED THERAPIES IN ONCOLOGICAL ORAL PATHOLOGY

5th Study Year, 2nd Semester

University year 2023-2024

Evaluation and diagnosis
methods of oral lesions,
through current and
innovative approaches.
Introducing the concept of
personalized therapy with a
major impact in oral
oncology pathology.

Identifying the characteristics
specific to the categories of lesions
(premalignant, potentially
malignant and malignant) and their
correlation with the presence of risk
factors. Acquiring the concepts to be
able to implement the individual
risk calculation.

The role of salivary
biomolecules, gene therapy
and nanotechnology,
photodynamic therapy and
immunotherapy in the
development of screening
methods and individualized
therapy.
