

## WHO CAN JOIN?

- Open to students in year 5
- Optional course: easy to integrate into your schedule

## ENROLLMENT INFO

- Sign up via university
- Limited spots available!

## CONTACT

- Assoc. Prof. Dr. Laura Haidar, MD, PhD
- Consultant in Allergology and Clinical Immunology
- Email: haidar.laura@umft.ro

# EXPLORE THE WORLD OF ALLERGIES – JOIN THE OPTIONAL **ALLERGOLOGY** COURSE!

## ? WHAT IS ALLERGOLOGY?

Allergology is the medical specialty that explores allergic diseases — from rhinitis and asthma to food allergy, urticaria, and anaphylaxis. Learn how the immune system can go rogue — and how we bring it back to balance.

## ■ WHAT YOU'LL LEARN

- Fundamentals of allergy and hypersensitivity
- Common and rare allergic conditions (e.g., food, drug, venom)
- Immunological mechanisms of allergy
- Modern diagnostic tools: skin tests, specific IgE, component-resolved diagnostics
- Therapeutic strategies: from antihistamines to immunotherapy and biologics
- Case-based discussions and real clinical examples

## ✓ WHY CHOOSE ALLERGOLOGY?

- It's relevant to ALL medical fields (internal medicine, pediatrics, dermatology, ENT...)
- It's a dynamic, growing specialty
- You'll better understand immunity, inflammation, and personalized medicine
- Great for future researchers and clinicians alike

## 🩺 INTERACTIVE FORMAT

- 1 semester
- Case-based teaching
- Clinical exposure (where available)
- Mini quizzes, group activities, and a final mini-project (no stress!)
