The course is designed for second-year foreign students specializing in **GENERAL MEDICINE, ENGLISH SECTION**. It is an active course, focused on practical Romanian.

The objective of the units is to provide learners with the linguistic and conceptual skills necessary to communicate effectively in the medical field.

# Specific objectives

Understanding and appropriate use of medical vocabulary, the ability to interpret and communicate medical terms accurately, as well as mastery of medical documentation conventions.

Additionally, the course aims to develop understanding of medical culture and professional standards, as well as the appropriate utilization of available resources for medical research and communication.
